("ProPhotonix" or "the Company")

ProPhotonix releases the Compact Green Laser Diode Module

New range of Green Laser Modules provides compact solutions for Alignment, Positioning & Light Scattering Applications

ProPhotonix Limited (London Stock Exchange - AIM: PPIX and PPIR, OTC: STKR), a designer and manufacturer of LED illumination systems and laser diode modules with operations in Ireland and the United Kingdom, today announces the release of the Compact Green Laser Diode Module, an extension of the Compact Laser Diode Module Series.

At 8mm in diameter, the Compact Green module is designed for applications where space is a key consideration. As well as their compact size they have high reliability and constant power output. The low current requirements of the modules mean they can be battery operated which makes them ideally suited to a wide variety of applications.

The Compact Green Series of 520nm lasers are available in a range of output powers and with elliptical spot, collimating and diffractive options.

Jeremy Lane, Managing Director of Laser Operations stated, "With the launch of Compact Green series we have taken advantage of our position as a leading laser diode distributor to access the latest in laser diode technology, delivering a truly compact, complete solution for our customers."

Visit ProPhotonix at Photonics West, Booth 1100.

About ProPhotonix

ProPhotonix Limited, headquartered in Salem, New Hampshire, is an independent designer and manufacturer of diode-based laser modules and LED systems for industry leading OEMs and medical equipment companies. In addition, the Company distributes premium diodes for Ushio (formerly Oclaro), Osram, QSI, Panasonic, and Sony. The Company serves a wide range of markets including the machine vision, industrial inspection, security, and medical markets. ProPhotonix has offices and subsidiaries in the U.S., Ireland, U.K., and Europe. For more information about ProPhotonix and its innovative products, visit the Company's web site at www.prophotonix.com.
