

20 September 2012

ProPhotonix Limited  
("ProPhotonix" or "the Company")

### **German Language Website Launched**

*Addresses Expanding Market of Machine Vision Customers*

ProPhotonix Limited, (London Stock Exchange - AIM: PPIX and PPIR; OTC: STKR.PK), a designer and manufacturer of LED illumination systems, laser diode modules and a laser diode distributor announces the addition of a German language machine vision website [www.prophotonix.de](http://www.prophotonix.de).

ProPhotonix has undertaken this endeavor to address its growing machine vision market in Germany and simultaneously support the expanding ProPhotonix sales team presence in Europe with specialists focused exclusively on this key market.

Since the introduction of [www.prophotonix.com](http://www.prophotonix.com) in 2010, the Company has continually invested in improving and maintaining its state-of-the-art website and moving into foreign language versions advances this objective.

Mark W. Blodgett, Chairman and CEO, commented, "Machine Vision is universal. We are committed to giving our customers and prospects options for finding crucial information while providing support to our expanded presence on the European continent."

"We have invested in creating technical content in a straightforward manner on our English language website. Providing a German translation of targeted content helps German prospective potential customers gain exposure to information to help them solve their machine vision application needs," added Blodgett.
