ProPhotonix Limited
("ProPhotonix" or "the Company")

ProPhotonix expands product offering with four new Laser Diodes from QSI.

ProPhotonix Limited, (London Stock Exchange - AIM: PPIX and PPIR; OTC: STKR), a designer and manufacturer of LED illumination systems, laser diode modules and a distributor of premium vendor's laser diodes, today announces that it will distribute four new laser diodes from QSI.

The QL63H5SX R1, 635nm 20mw single mode laser diode is now available for applications such as optical levellers, power tool laser guides and alignment laser modules.

Three new high power IR laser diodes are available. The QL 83Q6SX and the QL83R6SX with output power levels of 150mw and 200mW respectively at an 830nm wavelength are ideal for motion capture and gesture recognition applications. Also ideal for these applications is the new QL84S6SX, an 845nm, 450mW multimode laser diode.

Tim Losik, CEO of ProPhotonix said of the launch "We are pleased to add these new laser diodes to our already extensive laser diode offering and look forward to working closely with customers to assist them in integrating the diodes into their applications."

Ted Kim, CTO of QSI said "We are very pleased to launch these new laser diodes on schedule and hope we can better support our customers with these new additions to the product line."
