ProPhotonix to Exhibit UV LED Curing Systems at Label Expo Americas

ProPhotonix Limited, (London Stock Exchange - AIM: PPIX; OTC: STKR), a high technology designer and manufacturer of LED illumination systems and laser diode modules, is pleased to announce that it will be exhibiting its range of UV LED Curing systems at Label Expo Americas, 13th – 15th September, Booth 3620.

In recent months, ProPhotonix has launched the COBRA Cure FX Series of innovative UV LED Curing Systems, designed specifically for UV curing of inks, coatings and adhesives. At Label Expo Americas in September, ProPhotonix will exhibit its full range of solutions for the first time.

The new UV LED systems are the result of 15 years of experience in UV LEDs and more than 21 years of LED experience working with OEMs. The COBRA Cure FX platform maximizes the inherent value of LED Solutions while also incorporating a number of unique features. These patent pending features have been developed to ensure ease of integration, optimum performance, maximum lifetime, safety and reliability in the field.

The COBRA Cure FX series offers many advantages for both equipment manufacturers and end-users. These compact, fan-cooled modules are designed for plug and play use, require no shuttering or extraction units and therefore deliver a significant space saving and a more environmentally friendly solution. The FX series is available in a range of wavelengths from 365nm - 405nm (multi-wavelength options also available) and delivers class leading intensity and edge to edge uniformity.

The platform is configurable to address a wide range of end-user requirements including optimized optics, customizable mechanics and electronic options.

End users will also benefit from innovative features, including a field replaceable window, designed to allow rapid replacement of windows with a build-up of ink mist, without the need for any special tools.

Feedback on the FX series from both OEMs and end users has been extremely positive.

Visit ProPhotonix at Label Expo Americas, Booth 3620.

About ProPhotonix

ProPhotonix Limited, headquartered in Salem, New Hampshire, is a high technology designer and manufacturer of diode-based laser modules and LED systems for industry leading OEMs and medical equipment companies. In addition, the Company distributes premium diodes for

Ushio (formerly Oclaro), Osram, QSI, Panasonic, and Sony. The Company serves a wide range of markets including the machine vision, industrial inspection, security, and medical markets. ProPhotonix has offices and subsidiaries in the U.S., Ireland, U.K., and Europe. For more information about ProPhotonix and its innovative products, visit the Company's web site at www.prophotonix.com
