ProPhotonix Limited

("ProPhotonix" or

"the Company")

**ProPhotonix' configurable UV LED Curing systems will be on display at
Labelexpo Americas**

Visit Booth 3620 to configure your solution

ProPhotonix Limited (London Stock Exchange - AIM: PPIX & PPIR, OTC: STKR), a high technology designer and manufacturer of LED illumination systems and laser diode modules, with operations in Ireland and the United Kingdom, announces it will be exhibiting its UV LED Curing systems, the COBRA Cure FX Series, at Labelexpo Americas, 25th -27th September, booth 3620.

ProPhotonix' UV LED Curing systems are built on a highly reliable platform with units operating successfully across multiple applications and industries. At Labelexpo Americas, the complete COBRA Cure FX Series will be on display. The configurable UV LED Curing system has been designed specifically for UV curing of inks, coatings and adhesives. ProPhotonix has taken an innovative approach to designing a range of UV Curing systems offering maximum flexibility making it customizable to your application requirements.

ProPhotonix can provide customized mechanics, electronics, connectors and optics for specific application needs and can support customers in identifying the best configuration. At Labelexpo Americas, the ProPhotonix' team will be available to discuss the series and how to, "Configure your UV LED Curing System."

Following recent successes with both OEMs and end users, ProPhotonix has announced significant investment into its UV production capability, to support the development and enhancements to the COBRA Cure FX Series. The latest addition to the optical configurations, the DW option, offers world class intensity and dose levels with a wide illumination angle of 110°.

Ken Reynolds, Business Technology Manager said, "The success of the COBRA Cure FX series is its flexibility which allows it to be consistently enhanced and evolved. Being a configurable platform, it offers customers the opportunity to design their ideal solution."
