

Conflict Minerals Statement

Regulation (EG) no. 1907/2006 (REACH Regulation) is an EU-Chemical-Regulation that entered into force on 1st June 2007. REACH is the abbreviation of Registration, Evaluation, Authorisation and Restriction of Chemicals. The purpose is to help to provide a strong protection level for human health and the environment.

As downstream user, we are liable for information towards our customers. We are not liable for the registration of substances.

Goods, which you purchase from ProPhotonix Ltd, do not by definition of REACH have to be registered. Chemical substances contained in our goods, which may possibly be subject to registration, have to be registered exclusively by our suppliers.

On the strength of our experience and work with our suppliers, we are able to state that all ProPhotonix products are fully in compliance with the ECHA Candidate List as amended on 17th January 2023.

Should there be any change in the REACH status of our goods or packages we will inform our customers.

In case of further questions regarding the implementation of the REACH regulation in our company, please do not hesitate to contact us.
